The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/677,088	Applicant(s) BYRUM ET AL.	
	Examiner MICHAEL G. MENDOZA	Art Unit 3734	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9, 16, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robert 6511490 in view of Schockart EP 608 580 A.

3. Robert teaches a band comprising: a strap, first and second end portions each integrally disposed at a different free end of the strap; and an inflatable bladder (fig. 4).

It should be noted that Robert fails to teach a transverse attachment mechanism comprising a male portion and a female portion, the male portion extending across at least a portion of the strap height along the transverse direction, the female portion extending across at least a portion of the strap height along the transverse direction, such that the male portion is insertable into the female portion along the transverse direction to secure the first end portion to the second end portion.

4. Schockart teaches a strap that used an attachment mechanism comprising a male portion and a female portion, the male portion (7) extending across at least a portion of the strap height along the transverse direction, the female portion (recess receiving 7) extending across at least a portion of the strap height along the transverse direction, such that the male portion is insertable into the female portion along the transverse direction to secure the first end portion to the second end portion. Therefore

it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Robert in view of Kuzmak as an alternative means for attaching the first end portion to the second end portion.

5. Robert/ Schockart teaches the band of claim 2, wherein the transverse attachment mechanism comprises a dovetail having a pin and tail portion, wherein the transverse member has a generally trapezoidal shape; a u-shaped portion and a gap; and a detent/retaining member (15).
